

# FULLY MANAGED WIRELESS CONNECTIVITY

## TIME 3G IP VPN

Machine-to-machine applications (M2M) such as bank Automated Teller Machines (ATMs), Supervisory Control and Data Acquisition (SCADA) and Point-of-Sales (POS) often face the challenge of losing last mile connectivity due to the limited physical access of its fixed line.

TIME 3G IP VPN is designed to meet the requirements of these M2M applications. It enables last mile connectivity to ATM sites, SCADA and POS where fixed line has limited physical access. This deployment option is also faster in areas with 3G coverage.

TIME 3G IP VPN is an Enhanced Service offered on top of the TIME IP VPN service. It serves as an economical backup link for your existing fixed line connectivity.
