IMPROVED BUSINESS AGILITY

Bring all your sites together on a single secure network to better manage your company's entire value chain, from simple emails to converged applications.

With TIME IP VPN, only one platform is needed to efficiently manage all your voice, video and data assets in a single, secure and convenient way.

What's more, our local and global reach enables us to fully manage your service with zero external dependency.

With TIME's exclusive direct access connection, there are zero middlemen or third parties. That means total dedication to service quality at competitive prices.

And we're scalable: whether it's point-to-multipoint or multipoint-to-multipoint connections, we can handle all manner of businesses, big or small.

All this with the contract option of 100% Uptime Guarantee, which means you enjoy zero worries and 24/7 uptime.

TIME IP VPN also offers optional Global IP VPN and 3G IP VPN add-ons to suit the needs of your business.

Better, because we can.

A NETWORK THAT THINKS

Our network is so smart, it thinks on its feet. TIME's Class-of-Service (CoS) traffic prioritisation features enable it to distinguish between high priority traffic (like ERP applications, voice and multimedia), from non-time sensitive traffic such as email.

We think 100% Uptime. Our robust, fully meshed, high-availability network, the Cross Peninsular Cable System (CPCS™), is Malaysia's only next-generation 100% IP/MPLS network. A network so good, we are able to offer you a 100% Uptime Guarantee.

We are future proof. Our IP VPN service offers bandwidth of up to 1Gbps, so you can select the capacity you need - now and years into the future.

We are internationally recognised. Our network is Metro Ethernet Forum (MEF) certified, a global recognition of performance, interoperability and reliability.

We think convenience. From a central network delivery platform to technically superior customer support, we have pulled out the stops to deliver the best connectivity and the best support, all the time.

Powered by CPCS™

- Self-healing architecture
- Fully resilient meshed DWDM network
- Future-proof technology

Highly Secure and Scalable

- Advanced encryption standard up to 256 bits
- Any-to-any site connectivity
- Customised bandwidth & access medium for each site

Advanced Network Management

- MEF 2.0 compliance
- Multiple platform accessibility
- Proactive network monitoring

IPv6 Ready

- Next-generation capabilities
- Virtually limitless Internet addresses
- Optimised software and hardware

Dedicated Support

- 24/7 support
- Proactive monitoring
- Network performance reporting

Future-Proof Capabilities

- Direct connection to TIME's 100% IP/MPLS core
- Single homogeneous network
- Sub-second network failover

100% Uptime

Secure

Flexible

Scalable

Extensive Reach

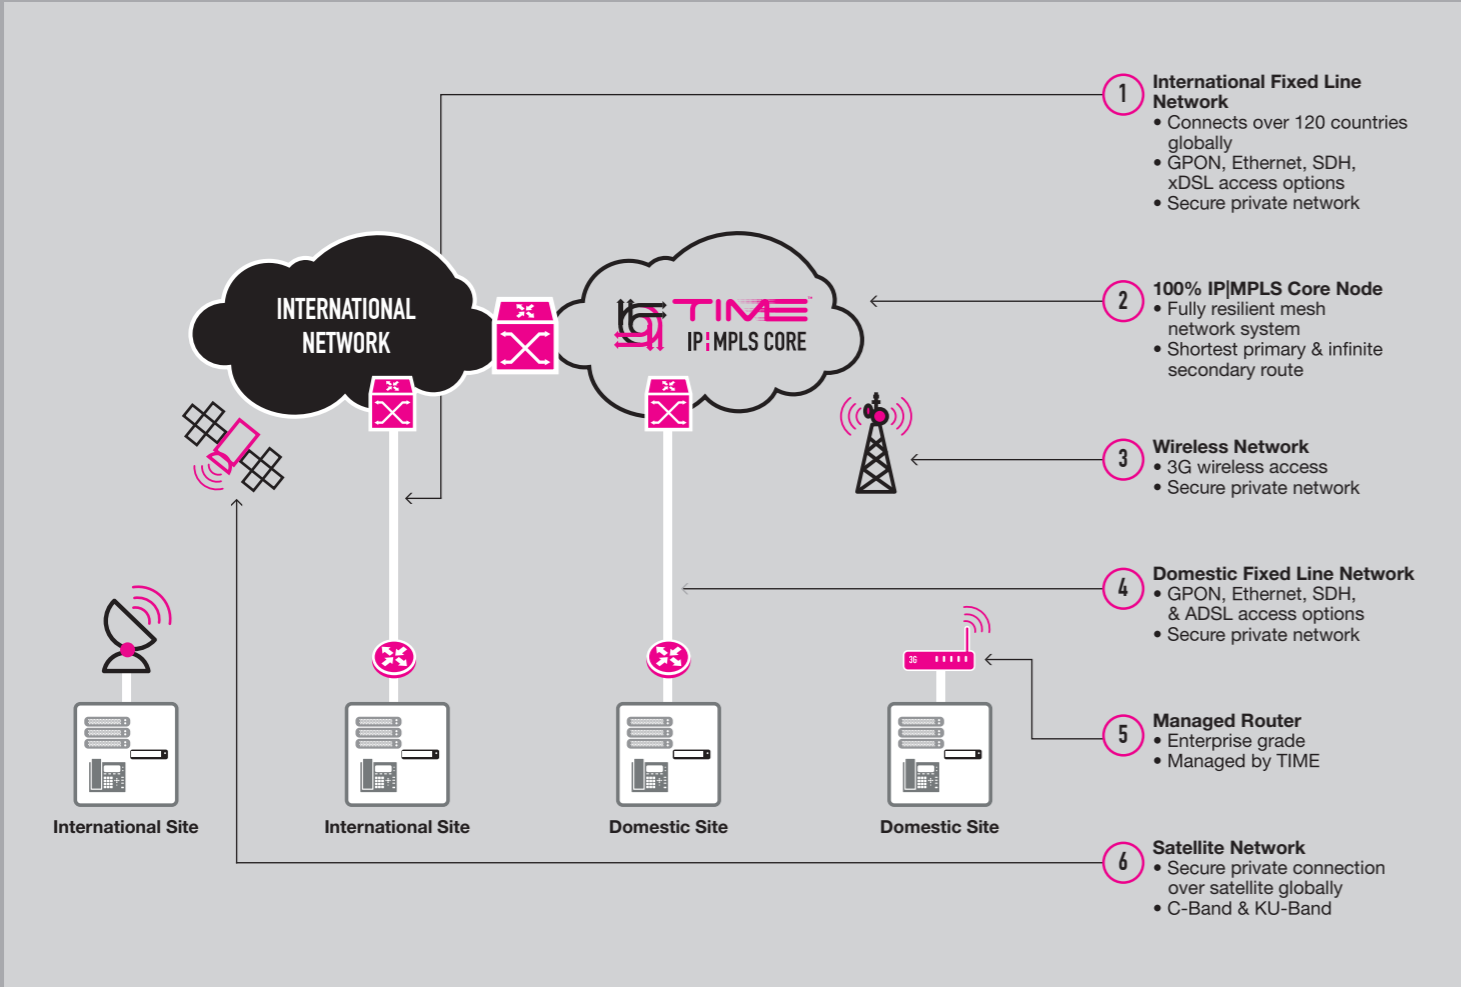

End-to-End Management

SERVICE ARCHITECTURE

We have built a solution that far exceeds industry standards. Our IP VPN connects your network directly to our 100% IP/MPLPS network, giving you access to a fully resilient infrastructure. This not only multiplies the resiliency of the link but also eliminates the risk and complexities of traditional architecture. If there is any fault within the core, it would be corrected within a sub second threshold.

Network Features:

- Secure Layer 3 private network
- Any-to-any network configuration
- GPON, Ethernet, SDH, xDSL, Satellite & 3G access options
- Single network for voice, video & business applications
- End-to-end quality of service management
- Empowers mobile employees with the necessary tools and resources

We're Built for Enterprise Needs

From our network delivery platform to our customer support, we have not compromised in delivering the best solutions to you. Mission-critical requirements are the norm for us with some of the most uncompromising customers operating off our network.

You get first-class service levels as your needs are supported by a Client Manager, your single point of contact.

Our DNA is hardwired for business.
