TIMETM

Key Features

Enterprise-grade Internet

- Dedicated Internet access
- Symmetrical upload and download speeds

High Availability

- Service Level Guarantee of up to 99.9%
- Mean Time To Respond within 15 minutes
- Mean Time To Repair within 4 hours

Advanced Network

- Self-healing network design
- Guaranteed bi-directional bandwidth
- MEF 3.0 certified

Fully Integrated Security Solutions

- Active security operation centre
- 24/7 monitoring with optimized threat detection
- Managed virtual firewall
- DDoS protection

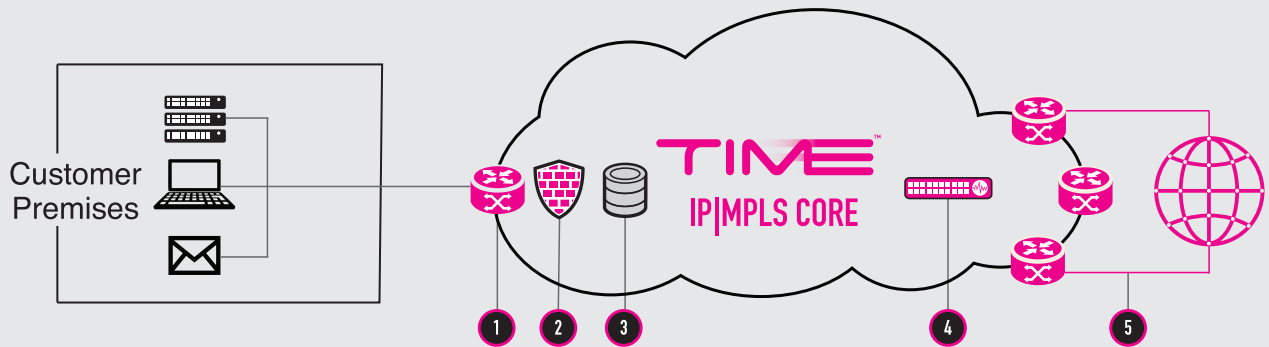

Key Specifications

Dedicated Link to Internet Gateway	✓
Multi-protocol Infrastructure	Metro E
Contention Ratio	1:1
IP Addresses	16
Security Operation Centre Service	✓
Real Time Threat Detection & Monitoring	✓
Managed Virtual Firewall with Unified Threat Management	✓
DDoS Protection	✓

Key Service Offerings

Features	Attributes
Topology	Point-to-Point over Metro Ethernet platform
IP	Fixed
Bandwidth	10Mbps to 1Gbps
SLA	99.7% & 99.9%
Built-in TIME Security Services	TIME DDoS Shield, TIME Managed Virtual Firewall with Unified Threat Management and TIME Security Advanced Monitoring

Service Architecture

1 TIME Managed Virtual Router

2 TIME Managed Virtual Firewall with Unified Threat Management
