

# TIME CLOUD INTERCONNECT

**DIRECT CONNECTIVITY  
TO CLOUD**

# CLOUD CONNECTIVITY MADE EASY

Connecting to the cloud is subject to issues such as high latency, lack of control over routes, inconsistent performance and exposure to threats.

TIME Cloud Interconnect eliminates such risks by enabling direct and secure connectivity to some of the biggest Cloud Service Providers (CSPs) in the world.

Fast

Secure

Consistent

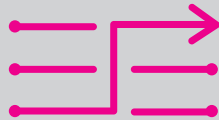

# HIGHWAY TO THE CLOUD

The solution uses a dedicated leased line to connect you directly to your choice CSP regardless of their bandwidth requirement.

It can be provisioned within a short time, and will run seamlessly in the background while you go about performing your day-to-day business. TIME will manage this service end-to-end giving you total peace of mind.

## Direct Access

- Secure and fast connectivity.
- Consistent performance.

## Multi-cloud Connection

- Direct connection to the most popular CSPs: Amazon Web Service (AWS), Microsoft Azure, Google Cloud Platform, IBM Soft Layer and Alibaba Cloud.

## Flexible

- Choose any bandwidth based on your CSP's requirement.

## Fast Provisioning

- Ready connection to CSP.
- Simplified network setup and design.

## KEY SPECIFICATIONS

Topology	Point-to-Cloud over Metro Ethernet platform
Cloud Providers	Amazon Web Service (AWS), Microsoft Azure, Google Cloud Platform, IBM Softlayer, Alibaba Cloud.
Bandwidth Offering	5Mbps to 1Gbps
Resiliency Options	1+0, 1+1
SLA	99.7% or 99.9%
Contract Period	Minimum 12 months
