

TIME SECURED INTERNET

COMPLETE SECURITY SOLUTIONS

IRONCLAD

INTERNET PROTECTION

The Internet is the foundation for all professional contact with your customers, employees and partners - all who require fast, secure and reliable connectivity to work, engage and conduct research.

As growing amounts of data are being transmitted via an ever-evolving network of computers and linkages, every care must be taken to ensure that unscrupulous hackers and scammers do not intercept and compromise valuable information.

With the Internet being under constant threat and becoming increasingly complex, its security and resilience have become a day-to-day necessity. However, while many different Internet security solutions exist, few provide the integrated one-stop solution that TIME Secured Internet offers.

Ours is a high-performance, secure solution that comes bundled with state-of-the-art security features. With us, you can be assured of total protection, while you enjoy dedicated high-speed access to the Internet.

Let TIME handle your network security needs, so you can get back to the main business at hand.

Better, because we can.

NEXT GENERATION SECURITY

TIME Secured Internet provides a comprehensive and integrated security solution based on the latest and most advanced technologies available. It is built to serve as an enhancement to TIME Internet Direct: high-performance connectivity delivered via a private leased line, with direct access to TIME's Global Internet Gateway.

This solution comes equipped with next-generation security features that comply with TIME's standard identification and control policies in pre-determining network and system vulnerabilities to safeguard your network from potential attacks.

As this is a fully managed solution, you need not assemble a dedicated in-house team to manage the security and performance of your network.

With a broad portfolio of managed services tailored to your business model, risks are mitigated in an ever-changing Internet environment, while ensuring cost efficiency, enhanced availability and end-user satisfaction.
