

WIFI SETUP

WIFI MANUAL

SETTING UP YOUR ROUTER

Follow these steps:-

1. Connect your computer to an available LAN port (1/2/3/4) on the TP-LINK C1200. Your computer will automatically obtain an IP address in the 192.168.x.1 range.

```
Command Prompt

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . : 
Link-local IPv6 Address . . . . . : fe80::c4e0:a1cc:7769:8a4a%12
IPv4 Address. . . . . : 192.168.1.2
Subnet Mask . . . . . : 255.255.255.0
Default Gateway . . . . . : fe80::1%12
                             192.168.1.1
```

2. Open a web browser and type `http://192.168.0.1` in the Address Bar.
3. When the login window appears, enter **Username** and **Password** where passwords are case sensitive.
Username: admin / Password: TIME (last 4 MAC address)
4. Check the **Software Version** and make sure it is the latest. If is not, please upgrade to the latest version.
